

Valve Adapter Tool PN 280036

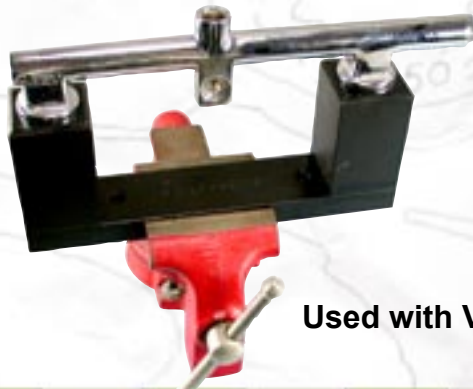

- Made in the U.S.A.
- Frame is made of high quality, lightweight Aluminum, lined with Acetyl plastic to protect the threaded surfaces of the valves
- Powder Coated flat black for durability
- Saves time, eliminates wasted effort
- Used to hold the Twin Manifold Body or up to two single valves during maintenance with out removing the Dip Tubes
- Allows you to properly torque all component parts
- Can be bolted down to a bench top or clamped in most vices
- Eliminates the need for improvised valve holders
- Eliminates the potential for damage to component parts and personnel injury
- A must have for Valve maintenance i.e. referred to in the Aqua Lung Valve Technical Manual

Shown in use with a Twin Manifold, single valves (Z Valve, J Valve) and used with a vice

Twin Manifold

Used with Vice

Single Valves
