

apeks TX50

TX50 is specially suited for the military, public safety or working divers that need a feature-rich regulator that can cope with harsh, cold water conditions.

- ANU listed, Section 1.4, Cold Water Service
- 4 LP ports - Swivel mounted
- 2 HP ports for redundancy
- High performance breathing achieved by the overbalanced 1st stage and pneumatically balanced 2nd stage
- Adjustable controls for opening effort and venturi assist allow the diver to tune the regulator throughout the dive for ideal breathing comfort
- Cold water performance achieved by:
 - Dry sealed 1st stage
 - 2nd stage inlet heat exchanger
- EAN40 compatible out of the box
