

TFSS - Tactical Flotation Support System

- The system consists of a right and left unit independent of each other.
- Each unit includes a reusable welded flotation bladder made of 200-denier nylon.
- Each unit has a container, an inflation system, and a pouch closure system.
- Inflation system actuated with a replaceable Leland 38 Gram CO2 filled cartridge.
- Each unit has a backup oral inflation tube.
- Specially designed grommet, loop, and pin (GLP) closure system prevents accidental deployment.
- Fully packed size is 6.5" X 2.75" X 2.25" and weights 1 lbs with charged cylinder.
- System (2 units) is designed as a "One Size Fits All" system.
- System designed to provide a minimum of 45 lbs of positive buoyancy at 33 ft and 78 lbs at the surface.
- The "Covert" system uses black bladders, while the "overt" system uses yellow bladders with reflective tape.
- System is available with three types of mounting straps for complete ensemble integration.
- The Closed belt loop version - part number 769200 - is ideal for integration to a duty belt in a fixed position.
- The MOLLIE loop version - part number 769212 - will integrate into any type of vest with MOLLIE webbing.
- The QR belt loop version - part number 769232 - is ideal for integration to a duty belt where a quick release using Velcro and a pull the dot strap are required.
- Special TFSS Nylon Belt with mating Velcro and quick release buckle available - part number 769210 BLK.
