

AQUA LUNG G3000SS Diving Helmet

Aqua Lung, world leader in design and manufacture of diving life support equipment, introduces the latest version of the legendary "Gorski Hat"...

The G3000SS Diving Helmet

Significant features:

- Aqua Lung & Gorski pedigree
- Apeks GX300 balanced regulator
- OTS comms system
- Dual exhaust protection
- No dissimilar metals
- Low component count
- Reduced maintenance load
- Converts easily from Demand to Free Flow mode

The G3000SS takes the durability and performance of the original Gorski helmet to a new level. Improvements include the latest Apeks high performance balanced regulator: Apeks diving regulators are the benchmark that other dive equipment manufacturers strive for in high performance and reliability.

GX300 BALANCED REGULATOR
designed and built by

Fully CE Approved to standard EN15333-1:2008 for surface-supplied diving equipment. Independently tested by Det Norske Veritas - Germanischer Lloyd (DNV GL), the world's leading classification society for the offshore oil, gas and diving industry.

Aqua Lung represents the highest standards in diving life support : the G3000SS Diving Helmet continues this ethos
