

# AQUA LUNG® HELMET SIDE BLOCK

Military & Professional

G3000SS Helmet Modification Kit

The **Helmet Side Block** valve allows the diver to switch from a primary air supply to an alternate bailout air supply (Emergency Gas Supply – EGS). The **Helmet Side Block** is used with the **G3000SS** diving helmet and a standard bailout air supply.

## Features

- Robust, durable and reliable
- User-friendly set-up and operation
- Located in commonly used side-of-helmet position
- Compact design with low weight penalty - does not affect balance of helmet
- CE Approved to standard EN15333-1:2008

## Ports

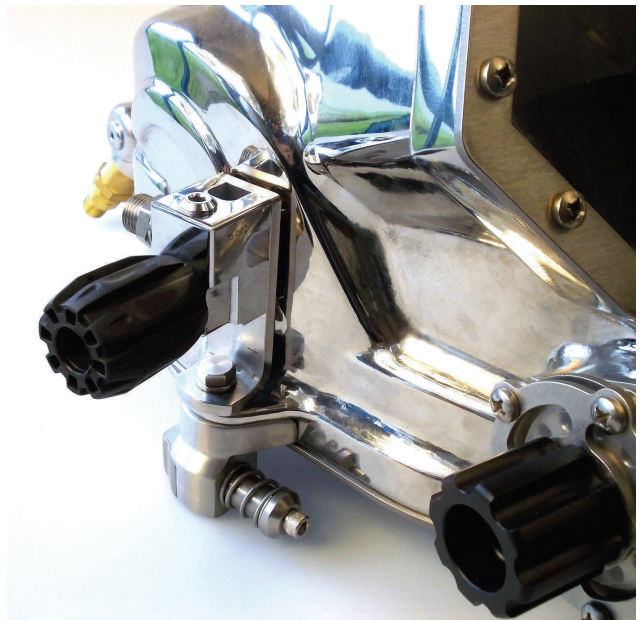

- 1 x Bailout supply inlet port
- 1 x Bailout hose connector, connects to helmet using short external hose with elbow

## Mounting Arrangement

- Kit contains side block, bolt, hose and elbow
- Utilizes existing G3000SS latch fixing point
- Retrofits easily to existing G3000SS helmets

## Other Bailout Options

- Harness-mounted Bailout Switch Block (AP0281/G) for G3000SS helmet

AP0281/SB
