

The **Bailout Switch Block** allows the diver to switch from a primary gas supply to an alternate bailout gas supply (Emergency Gas Supply – EGS). The Switch Block is used with any diving helmet or full face mask with a medium or low pressure gas supply.

Key Features

- Robust, durable and reliable
- User-friendly configuration and operation
- All ports marked for easy identification
- Use with surface-supply umbilical & bailout or Scuba cylinders
- CE Approved to standard EN15333-1:2008

Ports

- 4 x standard 3/8in MP outlet ports
- 1 x Bailout inlet port with 3/8in Hose Adaptor (male)
- 1 x 1/2in NPT dual-use outlet/inlet port: see versions below

Mounting Arrangement

- Universal mounting plate suitable for all diver harnesses
- Block retained in place by spring-loaded button catch
- Key User Feature: Block easily removable from the harness mounting
- Mounting plate available separately

Switch Block Versions

- AP0281/G • For use with the Aqua Lung G3000SS Diving Helmet
- AP0281 • For use with all other full face masks and diving helmets. Includes non-return (one-way valve) and 4 x umbilical adapters
- AP0281-PS • Same as AP0281 but with single Scuba adapter. Ideal for use with primary and secondary cylinder configuration (e.g. police/public safety diving).

BAILOUT SWITCH BLOCK
designed and built by:
