SPECIFICATIONS

Weight 2 lbs., 4 oz. **1st Stage** Balanced diaphragm **Ports** 1HP, 4LP **2nd Stage** Pneumatically balanced **Adjustments** Venturi lever **MSRP** \$440
aqualung.com

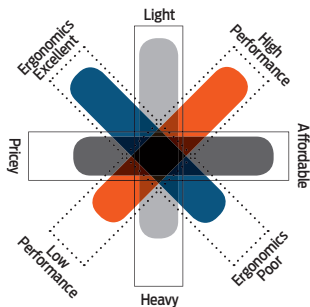

FEATURES

Lighter than its predecessor, the Titan LX regulator sports Aqua Lung's ACD (auto-closure device), which keeps water out of the first stage. The second stage comes with an easy-to-use venturi lever to prevent free-flows at the surface, as well as Aqua Lung's Comfo-Bite mouthpiece. This gem delivered the second-best performance in its price category on the breathing machine, and it's a dry, easy breather in all positions in the water. It has virtually no bubble interference and is easy to clear. All test divers felt that the light weight of the second stage eliminated jaw fatigue.

Bottom Line All the performance you could possibly want and our test divers' favorite reg in the Less Than \$500 category.
