

AQUALUNG VRA

Military & Professional

Vehicle Rescue Air

Features

- The VRA (108386) uses clean compressed air (divers or firefighters)
- Components of system are identical to the Survival Egress Air (SEA)
- The VRA uses a 6 cubic foot aluminum cylinder estimated to provide 6 to 8 minutes of air at 20 fsw
- VRA bracket and pocket sold separately
- VRA pocket (108426) is made of CORDURA® fabric for rugged performance
- The SEA mouthpiece is secured inside a pouch and sealed with hook and loop
- To deploy, the user will locate the red beaded handle and remove mouthpiece and hose assembly from protective pouch
- During egress, the VRA and pouch can be clipped to the user with carabineer (included with pouch)
- VRA bracket (108427) is made with spring steel arms that allow for easy stowage/removal
