

1st and 2nd Stage with Hose

- Product is a kit that utilizes the next generation of Emergency Breathing Systems (EBS) components of engineering grade composite materials to create a system that is 20% lighter than the legacy kits.
- Kit is designed to reset with legacy aluminum cylinders operating at 3000 PSI (200 bar).
- Reset procedures to legacy aluminum cylinders simple and easy.
- Kit weighs only 1.23 pounds (0.56kg).
- Remote mouthpiece with teeth grips provides for a secure and intuitive hands-free operation and unrestricted head movement.
- Lightweight, flexible, and robust braided hose provides for ease of deployment and is available standard in the two most popular lengths.
- Easy to read dial pressure gauge.
- Tested to the worldwide recognized U.S. Military environmental standard MIL-STD-810G.

Lightweight 1st Stage

2nd Stage Easy to Detach Without Tools
