

SEA Survival Egress Air

This compact air bottle system is an emergency air source, designed for air crews and passengers, for the purpose of accidental aircraft ditching. The SEA can and is being used for passengers who fly over water in their mission profiles. The system weighs less than 3 pounds and has a remote mouthpiece for hands free operations and unrestricted head movement. This system is perfect for aviation, ground soldiers who fly as passengers over water and other applications that require an emergency breathing device. The pressure indicator is available in either a spring PIN indicator or an analog DIAL gauge. The LV2 second stage with new flexible hose is our latest technology. Available for expedited delivery.

PRODUCT CODE	DESCRIPTION
1083-20	SEA-MK 2.0, 20" hose, dial gauge
1083-30	SEA-MK 2.0 20" hose, pin gauge
1083-60	SEA-MK 2.0 27" hose, pin gauge
1083-70	SEA-MK 2.0 27" hose, dial gauge
1083-82	SEA 20" hose dial gauge, no on/off, no cylinder (USCG Model)
1084-65	SEA 27" hose dial gauge, no on/off, no cylinder (USCG Model)
SEA/LV2	DESCRIPTION
1084-00	SEA/LV2 MK 2.0 20" hose, dial gauge
1084-05	SEA/LV2 MK 2.0 20" hose, pin gauge
1084-10	SEA/LV2 MK 2.0 27" hose, dial gauge
1084-15	SEA/LV2 MK 2.0 27" hose, pin gauge
1084-20	SEA/LV2 MK 2.0 27" hose, dial gauge (HESP Model w/markings)
1084-45	SEA/LV2 MK 1.5 20" hose, dial gauge (USN Rotor Wing Model)
