MILITARY & PROFESSIONAL DIVISION

TO: Military Customer
FROM: Glen Rubin Military Diving Program Manager
DATE: 10July2016
SUBJ: Syllabus for Aqua Lung Factory Training (OC Tec)
Ref: Diving Advisory 16-08

Dear Military/Government Customer,
The release of NAVSEA Diving Advisories 16-08 states:

EQUIPMENT COVERED BY NAVY TECHNICAL MANUALS AND PMS MAY BE MAINTAINED BY PQS QUALIFIED TECHNICIANS OR AS LISTED ON THE PMS CARD.

But military commands can still opt to receive Factory Technician Training by a qualified Aqua Lung M&P representative.

To receive Factory Training please contact me for a listing of authorized instructors and class availabilities/location, and price.

OC Tec Syllabus:

The objective of the OC Tec course is to train military and government divers/technicians in the repair, maintenance and inspection of SCUBA regulators manufactured by Aqua Lung and Apeks.

Students will receive hands-on instruction using command provided or instructor provided OC regulators. Upon completion of the course, students will receive a certificate stating they have received Factory Authorized instruction. This certificate is valid for 3 years from date of issue.

It is important to note that the recipient's chain of command will determine if the recipient is proficient in the skills taught during the OC Tec course. Furthermore the recipient's chain of command will determine if the recipient is qualified and will ensure the recipient receives refresher training as required.

OC Tec Training objectives:

- General guidelines and conventions for regulator repair
- Review of the required tools and repair kits
- 1stg and 2stg regulator disassembly procedures
- 1stg and 2stg regulator cleaning and lubricating procedures
- 1stg and 2stg regulator re-assembly procedures
- 1stg and 2stg regulator adjustment and testing procedures
- 1stg and 2stg regulator troubleshooting procedures

Who can teach: Contact me for a list of qualified Instructors nearest your location

When: The course is offered upon request and can be schedule with the Instructor

How long: Course length is approximately 6 hours

How much (2016): \$850 for in-house training (you come to us) / \$950 plus travel expenses (we come to you)

Thank you,
Glen Rubin
